

Submission Guidelines:

The Banner welcomes submissions from all members of the mathematics education community, not just MCTM members. To submit an article, please attach a Microsoft Word document to an email addressed to strickland@hood.edu with "Banneker Banner Article Submission" in the subject line.

Manuscripts should be double-spaced, 12 point Times New Roman font, and a maximum of 8 pages. APA format should be used throughout the manuscript with references listed at the end. Figures, tables, and graphs should be embedded in the manuscript. As the Banner uses a blind review process, no author identification should appear on manuscripts. Please include a cover letter containing author(s) name(s) and contact information. If electronic submission is not possible, please contact the editor to make other arrangements. You will receive confirmation of receipt of your article within a few days, and will hear about the status of your article as soon as possible. Articles are sent out to other mathematics educators for anonymous review, and this process often takes several months. If you have questions about the status of your article during this time, please feel free to contact the editor. Please note that photographs of students require signed releases to be published; if your article is accepted, a copy of the release will be sent to you and it will be your responsibility to get the appropriate signatures. If you would like a copy of this form at an earlier time, please contact the editor.

Readers who have developed successful classroom activities are encouraged to submit manuscripts in a format suitable for immediate use in the classroom. Submissions should help students understand mathematics or help teachers teach mathematics from either a conceptual or procedural instance while modeling effective pedagogy and addressing at least one Maryland College and Career Readiness Standards/Common Core content standard and/or mathematical practice. We want teachers who have developed successful Student Activities to share them. A successful Student Activities is one that is enjoyable to teach, that works well with students, that other teachers might adapt for use in their own classroom; and that is centered in developing students problem-solving and discourse Student Activities can be for any grade level and should be in final format.

When composing your manuscript in Microsoft word, please: use one-inch margins, Time News Roman font type size 12, and a maximum of 4 pages. Authors should include a brief description of theirs and their students' experiences during the implementation as well as of insights gained from it. Any citation should follow APA Style (6th edition). The required list of references may not count toward the four-page limit of this section. Submissions will be sent out for review. Prospective authors should submit manuscripts with the subject line "Student Activities" to prof.lima@gmail.com .
